MWM at the EnerExpo in Vietnam

February 2010
No. 10-02-04

Mannheim, February, 04, 2010

The EnerExpo that will be held from March 17 to 19 in Hanoi, Vietnam, is an international specialized exhibition for renewable and decentralized energy solutions of the global energy, power, and supplier industry, offering an attractive market platform for the first time. The list of exhibitors includes MWM (Germany), which will feature a booth in the German Pavilion, an initiative of the German Federal Ministry of Education and Research.

MWM is one of the world's leading suppliers of highly efficient and environmentally friendly energy systems. The company MWM, based in Mannheim, Germany, can draw on more than 135 years of experience in the development and optimization of internal combustion engines for natural gas, special gases, and diesel fuel.

With over 1,150 employees and 10 subsidiaries worldwide, the company focuses on ecologically progressive solutions for producing "clean energy".

"To this end, cutting-edge, high-performance products, services, and technologies have been developed for several decades for decentralized energy supply using gas and diesel engines", explains Dr. Ruprecht Lattermann, President and CEO of the wholly-owned subsidiary MWM Asia Pacific,

headquartered in Singapore. Lattermann adds: "The output ranges from 400 to 4,300 kW for gas generator sets and from 780 kW to 2,455 kW for diesel generator sets.

MWM is active in four market sectors: in the cogeneration sector, natural gas is used for energy production, a field in which MWM is able to provide optimum solutions for individual applications with its gas engine systems. The rapidly growing special gas sector includes biogas and flammable gases emitted during industrial or mining applications or in the extraction of raw materials. The greenhouse segment covers systems for heating and supplying energy for greenhouses as well as the simultaneous fertilization of the plants using the filtered waste gas. Diesel engines continue to complement the gas engine systems.

MWM also provides worldwide customer service for the installation, servicing, and maintenance of systems. Furthermore, the Mannheim-based company offers courses at its own training center.

By participating in the EnerExpo 2010 in Hanoi, Vietnam, MWM intends to enhance its presence in the Vietnamese market and expand the basis for establishing long-term business relationships in one of the region's fastest-growing markets. See www.mwm.net for further information.
